AXIA INNOVATION

AXIA Innovation offers high added value services in European project and business development, coordination and implementation. We provide our clients with a full-service concept to develop projects and networks towards sustainable European communities.

What we do...

Technology Transfer

- Bridge knowledge developed in Universities, research centers, research intensive enterprises and industrial companies
- Help adopt new technologies to capture new market competitiveness

Communication & Design

- Design and development of communication strategies
- Generate events to convey messages to target audiences
- Marketing strategy including advertisements, websites, flyers, brochures, social media

Innovation Management

- Innovation strategy
- Innovation organization
- Innovation culture

Project Management

- Research project management
- Financial management
- Dissemination & Exploitation
- Meetings organization

Innovative thinking emphasizing on sustainability & circular economy

- Renewable energy sources
- Process design and optimization
- Development of decision support platform tools
- Development of models and platforms for biomass-based manufacturing systems
